

# Virtual CIO (vCIO)

Enhance IT capabilities for  
greater business outcomes

*"vCIO gives you a trusted partner in IT so you can reach your business goals faster."*

# No matter what your business challenges, our team of experts are dedicated to helping you achieve more.

We know that no two businesses are the same, so we offer flexible options designed to complement your needs. Whether it's high-level strategic advice to assist your in-house team, project planning and implementation, compliance advice, business process improvement, new technology recommendations, or IT budgeting, we can build a vCIO plan that is right for you.

## How vCIO can benefit business

Many businesses enlist the services of a vCIO (virtual Chief Information Officer) to act as a trusted advisor to the management team or internal IT team. With access to on-call expertise and leadership, your business can make better informed IT decisions that align with your business goals.

vCIO can be a competitive advantage for SMBs, providing high level support for your in-house team, or removing the costs associated with employing and training full time IT executives.

- ✓ **Align IT systems to business objectives**
- ✓ **Keep IT projects on time and budget**
- ✓ **Leverage technology trends**
- ✓ **Reduce time and money spent on IT**

## Designed for your business

While every TechPath vCIO agreement is designed to suit the individual needs of our customer, there are some features you can expect. You'll have access to your own virtual Chief Information Officer, as well as direct access to our team of highly certified engineers. Our team are ready to help you to implement and manage the best technologies to align with your business objectives.

## Available when you need us

As your business changes and grows, we can be there whenever you need us. Our plans offer fixed cost billing with flexible contract time frames. Our aim is to partner with you for as much or as little as you need us to, so you can get the most out of your IT.

## The TechPath difference

TechPath's team of consulting engineers has a wealth of experience, as well as accreditation from leading hardware and software vendors. They are not only skilled in technology; every TechPath consultant draws on considerable insight into business processes and strategies. This enables them to work with your team to help you get more from your technology investments.
